

# 466% ROI: What Happens After Deploying K2's BPA Platform

Your enterprise can't afford to gamble when shopping for a solution that's going to make or break your digital transformation strategy. That's why K2 commissioned Forrester Consulting to show how K2 blackpearl significantly lowers business process app development costs, improves time-to-value and increases business process efficiency.\*

Based on interviews with several K2 blackpearl customers and a subsequent financial analysis (Total Economic Impact™ Study), Forrester created a composite organization of 5,000 employees that experienced these three-year risk-adjusted results in addition to a high ROI:

Payback: **9.2 months**

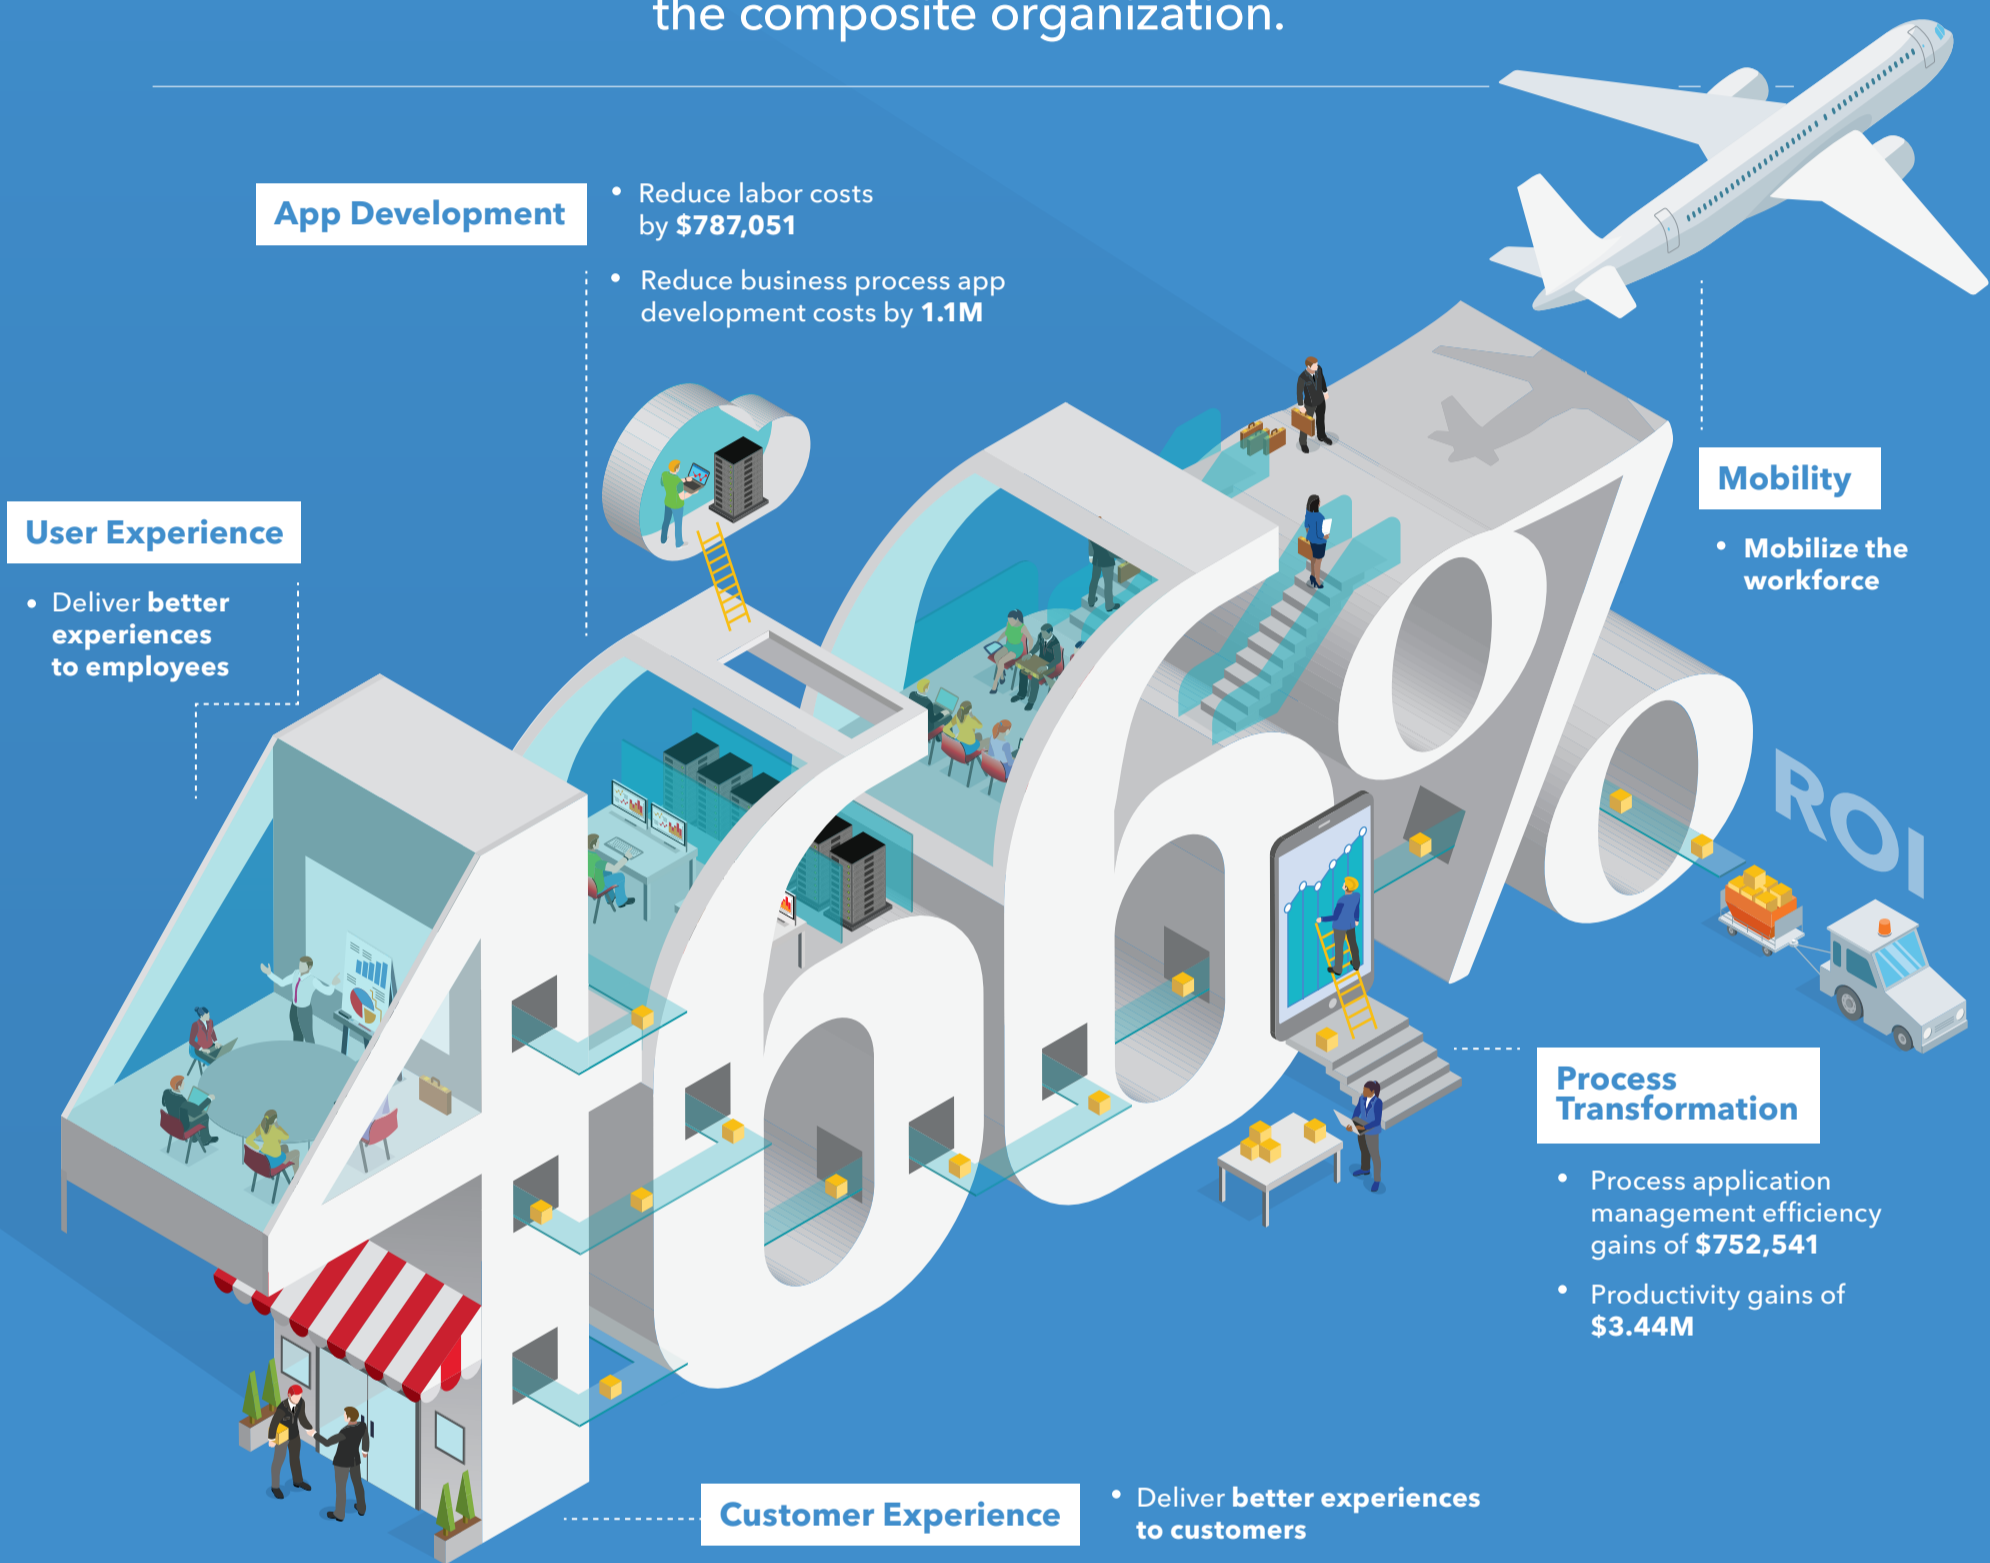

Total benefits: **\$6.1M (PV)**

Reduced application development time by: **78%**

Take a closer look at the benefits that mattered most to the composite organization.

"Some of our larger process application development efforts were taking six to eight months to develop using the .NET framework. We are able to produce some of these applications in **two to three months** now in the drag-and-drop K2 environment, and even quicker for simpler projects."

– Solution Architect, global CPG company interviewed by Forrester

"At any one given time, our organization is building eight to 10 apps a month on blackpearl, with a running completed total of roughly **600 apps** currently."

– Solution architect, global CPG company interviewed by Forrester

Interested in learning more about the value your organization can derive out of using K2 to cut costs and complexity from process management?
