Centralise your critical information....

WorkCentre

Change the way you operate.

One Location To Achieve Every Task
Operate with pure efficency in an i2 Management customised interface

Operate From A Single Interface

Visualise Important Data

Launch Automated Processes

Integrate With Workflows

Receive Task Notifications

Work With Multiple Data Sources

Collaborate With Others

Customise With Relevant Information

Built with client experience at the forefront, WorkCentre is designed to create a single interface for all your required tasks. We worked with our professional clients to deliver a product that would add value. WorkCentre integrates seamlessly with key applications to surface your most relevant content, control your tasks and collaborate, all from the one location.

Customise Information

Operate From A Customised Coversheet
Get the most from iManage by accessing critical information instantly

A simple click on any iManage workspace and you can visualise your critical data and bring the most relevant information to your users with the WorkCentre coversheet. The HTML-based coversheet is designed to assist the professional user by delivering the most important content upfront.

Save valuable time by presenting the critical information, from multiple systems, in a single customised interface embedded in Outlook or iManage DeskSite.

Integrate With Your Important Applications
Hook in to workflows and automated processes with ease

Launch automated processes and track your tasks all from WorkCentre. Never leave the interface as WorkCentre integrates important tools for document automation and workflow at the click of a button.

Collaborate with teams more productively through communication captured on the WorkCentre coversheet, keeping your workspaces up to date and organised.

Experienced Benefits

- ✓ Efficiences gained managing workspaces
- ✓ Improved workspace visibility
- ✓ Increased workflow productivity

- ✓ Customisable user-facing interface
- ✓ Time saved through systems integration
- ✓ Boosted user collaboration

Centralise your critical information.
